

RESONA-SA Natural Cork DECOR, **fine finish**, is a product that has different properties inherent to its composition and execution: breathability, thermal help, sonoreductor effect, decorative, elasticity, respectful of the environment, product formulated on a water basis.

Against a fire, presents an auto-extinguishable behaviour.

It's high breathability allows the product to avoid condensation problems, favoring the elimination of the capillarity moisture (**it resolves moisture problems**).

It's usable in marine environment, **protecting from saltpeter**. In addition, if applied as a coating of bricks, prevents the appearance of white spots produced by salts.

*Available the whole range of colors RESONA-SA

Property	Value	Ut.	Normative
Adhesion by direct traction	20	N/5cm	EN 1542
Permeability to water vapor	243	gr/m ² /24h	EN 7783-1 y 2
Capillarity absorption and water permeability	0,10	W Kg/m ² ·h ^{0,5}	EN 1062-3

Property	Value	Ut.	Normative
Thermal conductivity λ	0,044	W/m·K	UNE-EN 12667
Anti-slip	3	-----	UNE-ENV 12633
Salt spray test	Stable	-----	UNE-EN ISO 9227
